21 11 1962

MEMORANDUM FOR: Deputy Assistant Director, OSA
SUBJECT: Take Progress on Mission 3091

1. The following list shows the progress of Mission 3091 take from the landing at Laughlin AFB to the publishing of the IPIR by NPIC.

Mission 3091 landed	17/1230 EDT
Unloading, processing, repackaging: 7:50	
A3D departed Laughlin AFB	17/2020 EDT
A3D landed Andrews AFB	17/2330 EDT
Film arrived at NPIC	18/0026 EDT
IPIR due out	18/0300 EDT

2. Both the primary camera film and the tracker were processed simultaneously at Laughlin. Also, there was minor aircraft maintenance required on the A3D so the departure of the A3D was delayed, hence the difference between the six hours predicted for ground time at Laughlin and the actual time of 7:50.

3. Only 1500 feet of film were exposed on each roll and little of this is exploitable because of cloud cover, so it must be emphasized that the processing and readout time is shorter than usual.
